

SUDEEPHA R

Jr Software Developer

Rajapalayam, Tamil Nadu | 8668101158 | sudeesudee78@gmail.com | [Github](#) | [linkedin](#)

SUMMARY

Software Developer and Cybersecurity Enthusiast with hands-on experience in full-stack web application development using React, Node.js, and SQL, along with REST API design and integration. Skilled in UI/UX design tools such as Stitch and Figma, with a growing focus on AI-assisted development practices including context engineering, code validation, and effective ORM coding. Knowledgeable in cybersecurity fundamentals including the OWASP Top 10, data protection, supply chain security, and network security.

EXPERIENCE

Junior Software Developer | CybertVault Innovations & Technologies Pvt Ltd

01/2026 – Present

- Developed the STS mobile application using React Native for the frontend with an ASP.NET backend and SQL Server database, delivering cross-platform functionality for end users.
- Built Banking LMS, a web-based loan management system, using React.js for the frontend, PHP for the backend, and MySQL for data storage.
- Developed the STS Web Application using ASP.NET MVC Razor Views, HTML5, CSS3, Bootstrap, JavaScript, jQuery, and AJAX for the frontend; ASP.NET MVC (C#) and .NET Framework for the backend; and Microsoft SQL Server as the database.
- Conducted cybersecurity awareness sessions covering GitHub Security Best Practices, Keylogger Threats, and SOC Monitoring using Splunk SIEM.

Machine Learning Intern | Geons Logix

10/2024 – 11/2024

- Built and trained supervised Machine Learning models for predictive data analysis.
- Performed dataset preprocessing, feature extraction, and model performance evaluation.
- Applied classification algorithms for real-world data-driven problem solving using Python.

IoT Development Intern | Kevell Corp

06/2024 – 09/2024

- Gained hands-on experience in IoT development using ESP32 modules.
- Worked on real-time sensor integration, device communication, and IoT-based system deployment.
- Used the Kioski tool for practical IoT applications and prototyping.

TECHNICAL SKILLS

Frontend: HTML, CSS / Tailwind CSS, JavaScript, React.js, React Native

Backend: Node.js, Java, Express.js

Database: SQL

API: REST API

UI/UX Tools: Stitch, Figma

AI: Context Engineering, Code Validation, Effective ORM Coding

Cybersecurity: OWASP Top 10 (2026), Data Protection, Supply Chain Security, Network Security

PROJECTS

STS Mobile Application

2026

- Developed the STS mobile application using React Native for the frontend with an ASP.NET backend and SQL Server database, delivering cross-platform functionality for end users.
- Designed RESTful APIs in ASP.NET to handle authentication, data synchronization, and business logic between the mobile app and SQL Server backend.
- Built reusable UI components in React Native to ensure a consistent experience across Android and iOS platforms.
- Optimized database queries and schema design in SQL Server to improve app performance and data reliability.
- Collaborated with the team to test and debug the application, ensuring smooth functionality across devices before deployment.

Expense Tracker Web Application

2025

HTML, CSS, JavaScript-based expense management application

- Developed a responsive expense tracker web application using HTML, CSS, and JavaScript.
- Implemented CRUD operations using browser local storage.
- Designed interactive UI components and multi-page navigation.
- Deployed application using GitHub Pages.

TRAINING / COURSES

- Artificial Intelligence — Infosys Springboard
- Java Programming: OOP and SQL Demystified — E-BOX

KEY ACHIEVEMENTS

- FAER Scholar Award (20/06/2025): Project "Vision-Based Suspicious Detection and Alert System" selected by the Foundation for Advancement of Education and Research (FAER), presented at REVA University, Bengaluru; awarded Certificate of Excellence and ₹7,000 project funding.

EDUCATION

B.E., Electronics and Communication Engineering

2021 – 2025

Ramco Institute of Technology, Rajapalayam
